

# Quick sheet: Installing packages for Python

## Microsoft Windows

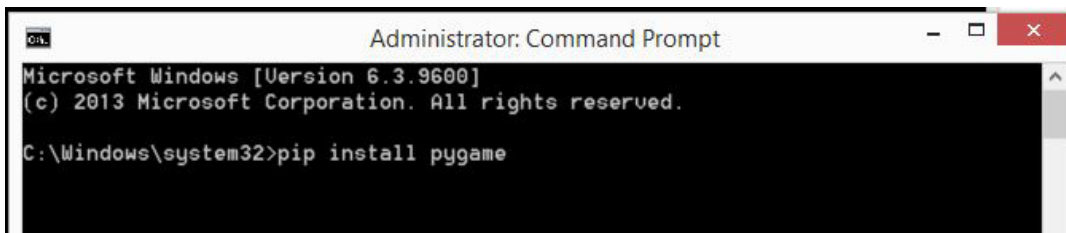

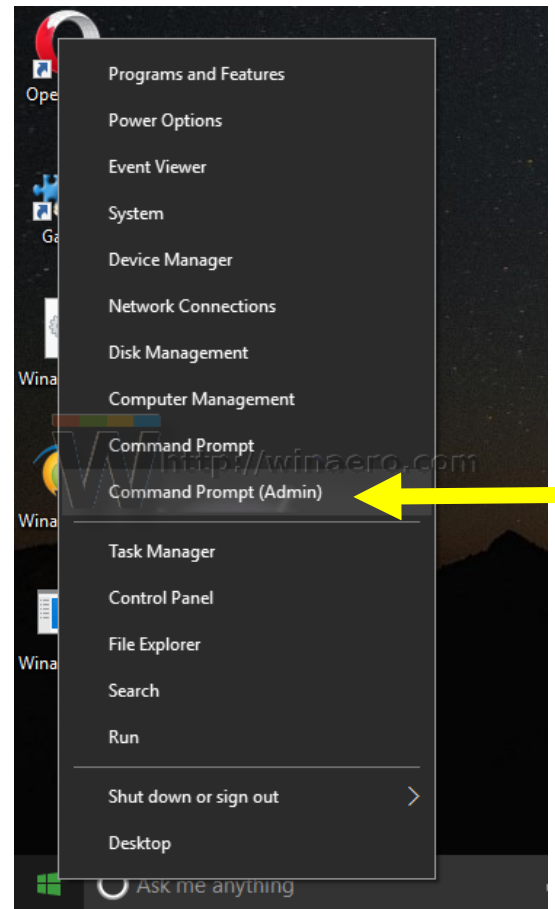

1. Press the **WINDOWS** and **X** buttons together for this menu to appear.
2. Select **Command Prompt (Admin)** as shown.
3. Approve **Yes** on the security dialog that appears.

4. The command to install a Python package is **pip install *packageName***

For example, to install pygame, the command would be  
**pip install pygame**

Or to install Pillow and ImageToolsMadeEasy, the command would be  
**pip install Pillow ImageToolsMadeEasy**

5. When complete, you may type exit to close the command prompt.
